*Forestry and Tree Surgery*

## Our Roots

# LOCALLY OWNED AND OPERATED FOUNDED IN 2014, SERVICING NORTH-EAST SCOTLAND

Based in Keith, Epic Tree Care are well equipped to undertake complex tree surgery works and provide forestry and arboricultural services. With over 10 year's experience, Epic Tree Care have been involved in a variety of works ranging from large-scale commercial tree planting to woodland management programmes such as selective felling, thinning and clear felling to precision dismantling and remedial tree care.

### **Safety first... always**

Safety is paramount in our industry. We enforce essential and recommended industry practices, alongside strict safety measures and working policies. Full site specific risk assessments are carried out on site prior to start of works. Every job we undertake starts with a detailed Risk Assessment and Method Statement.

### **Professional Qualifications and British Standards**

All tree pruning has an impact upon tree health and there needs to be good justification for its implementation. Any work we do will be carried out in accordance with British Standards (BS 3998; 2010) 'Recommendations for Tree Work'. We are members of the Arboricultural Association, a professional organisation that caters for our industry.

### **Our people**

Our people are our greatest asset. As you would expect from a professional forestry company, all staff are fully NPTC qualified and insured. With our core principle to innovate, improve, and provide excellence, we strive to modernise our industry in the local area.

### **Your experience with us**

Whether you are a customer, client, contractor, supplier or a member of our valued staff, we hope your experience with us is the most professional and enjoyable experience that you and your trees, forest or woodland estate deserve.

*"Our core principles are innovation, improvement, and the provision of excellence."*

**Clive Coney | Founder**

## Our Environmental Policy

### ECO-FRIENDLY AND SUSTAINABLE FORESTRY

## Recycling 99% of the waste created during tree work.

We are dedicated towards sustainable forestry. We employ a strict environmental policy and we are committed to our recycling targets of 99% of all waste created during tree work.

#### Environmental responsibility

Understanding and management of environmental issues is key. We appreciate the delicate balance that must be struck between commercial return and environmental requirements. Our advice is honest, pragmatic and specific to the needs of both the client and the tree/site.

#### Sustainability

We are in the application stage of a process to plant around 20 acres of our land with trees, making us pretty sustainable. Last year we bought a remote controlled sawmill which allows us to board up good timber, minimising wastage. We have in-house firewood processors, so the rest of the waste goes to firewood or woodchip, which is either sold, given to people in need, or composted on the yard for general gardening.

#### Environmental impact assessments

Some projects may require an Environmental Impact Assessment because of their scale, location, or perceived impact on the environment. We can advise on the best and most cost-effective approach.

#### Environmentally-sensitive sites

We have worked on environmentally-sensitive sites, including Sites of Special Scientific Interest (SSSI) for Scottish Natural Heritage. We also work with clients to deliver a range of environmental enhancements.

*“We look forward to working with you and your trees.”*

## Our Services

- 🍃 Domestic Tree and Hedge Services
- 🍃 Commercial Services
- 🍃 Estate, Woodland and Forestry
- 🍃 Sawmill Services
- 🍃 Timber Products and Fuelwood

Domestic, Commercial, Woodland Estates

## Our Services - breakdown

### SHAPE YOUR SURROUNDINGS

We're fully qualified, certified, and insured.

We provide services to Commercial Property Owners, Local Authorities and Councils, Conservation Groups like the Forestry Commission, and Residential Home Owners throughout North East Scotland. From large rural woodland estates, to parks and public spaces, to small urban gardens. We specialise in all aspects of forestry and woodland management, tree surgery, landscaping services, and timber harvesting. Our landscaping services include site clearance, fencing, habitat management, ecological restoration, and more.

- Services for Residential Home Owners - from large rural estates to small urban gardens.
- Services for Commercial Entities - from retail parks to urban gardens, and other public spaces.
- Estate Management, Woodland and Sustainable Forestry Services - including planting, clearance, and conservation.
- Sawmill Services - from sawmill hire, custom sawmilling, and timber haulage and movement services.
- Timber Products and Fuelwood - including dimensioned timber, firewood and woodchip.

All tree work is conducted to the requirements of BS 3998 (2010), and is fully compliant with industry best practice and current Arboricultural standards.

*"Epic Tree Care are equipped to undertake the most complex forestry and tree surgery services."*
